BEAUTIFUL HAPPENS BECAUSE WE LISTEN, AND WE EXECUTE.

In this catalog, Pavar has made the planning and design of clubhouse furnishings functional, attractive, and memorable in the golf and social experiences, for both members and their guests.

We match our clients' project-specific criteria with our manufacturing knowledge in the construction, detailing, finishing and quality of our products.

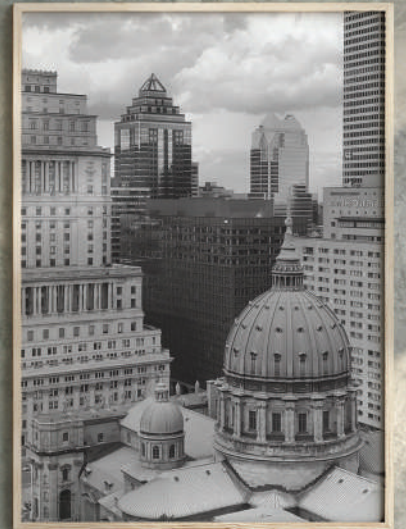

“For Pavar, every project we deliver is a self-portrait of the designer who created it, and we put your signature on it.”

MICHAEL DI PAOLO
President

EVERY GREAT DESIGN
BEGINS WITH AN EVEN BETTER STORY.

OUR STORY IS TOLD THROUGH OUR WORK,
OUR WORK IS BROUGHT TO LIFE THROUGH
OUR TEAM.

Pavar's manufacturing facility is nestled in one of North America's oldest cities, Montreal.

Whether you are walking on the cobblestone streets of Vieux Montreal, visiting the world-renowned Notre-Dame Basilica or cycling in the bohemian-inspired Plateau sector, it is apparent that design and European flair is at the core of our city.

A WIDE RANGE OF CHOICES

STANDARD SPRAY STAIN

Uniform, Even Stain Application

Standard stain finishes are achieved through a steady and evenly applied stain using spray guns.

In contrast to a wiping stain, the spray stain is left to dry and provides more coverage to the wood grain. Darker stain finishes tend to soften the wood grain.

WIPING STAIN

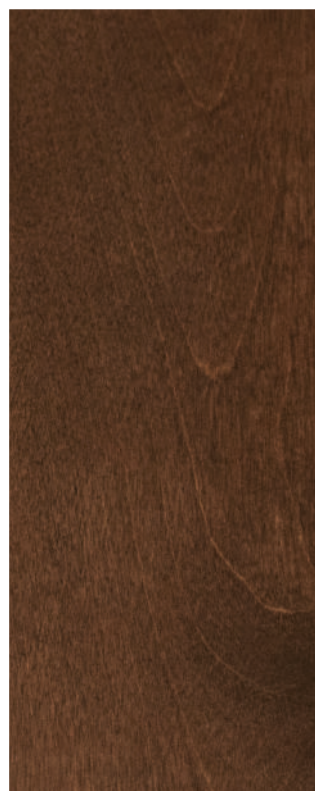

Hand - applied, Exposure of Wood Grain

A wiping stain finish is achieved by over applying the stain color, and then wiping it off, before it dries.

It achieves a finish that is far more natural in appearance than standard spray stain. A wiping stain showcases the wood grain and celebrates the natural variations in wood.

DISTRESSED FINISH

Aged & Weathered

To distress the finish, the sander is used on the surface of the furniture, once the paint has dried. With emphasis on the edges, the sanding gently distresses the paint and lacquer allowing the underlying base color and/or raw wood to show through.

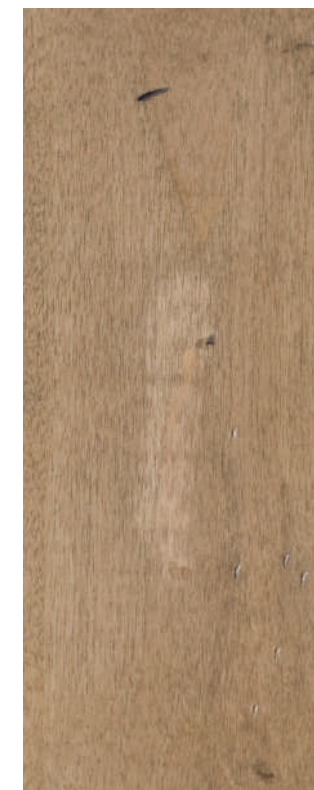

ANTIQUE FINISH

Scratches, Notches and Dents

An antique finish is a process by which we notch, dent and strike the wood to give the appearance of an aged piece of furniture, adding depth and character.

Important Note:

Due to natural variations in wood, the actual grain and finish may vary slightly from the samples and images provided. For normal daily care, dust with a feather duster or wipe with a clean, dry cloth.

We hope this book has helped you to better understand who PAVAR is and what makes us unique.

Authenticity, talent and hard work are the backbone of our success and is what connects us to our clients. If you are new to PAVAR, feel free to contact us to discuss how we can help make your designs come to life. It truly takes a community to build a chair and thanks to the talent and trust of our clients, we have the privilege to do great work.

We are enormously excited about what the future holds and hope you can join us on that journey.
